ADDITIONAL SPECIFICATIONS

- For file weight calculation, all files for the ad (.html, .js, .css, images, etc.) must be included as part of the maximum file weight calculation for all file load limits. Shared libraries are also included as part of the file weight calculation unless otherwise exempted. File weights are calculated after files have been compressed into gzip format.
- In case of multiple clickTags, extra clickTags should be named with suffix from 1 to n in continuation. `getURL(_root.clickTag, "_blank");` Sample:clickTag1, clickTag2, clickTag3.... clickTagN
- Loading files from cross domains is not permitted
- All creative are subject to approval by Exponential

AdChoices:

- AdChoices is an industry standard icon  that links people to information and control over how data about their interests is used to offer them more relevant advertising.
- Exponential places AdChoices in ads that run in the US and Europe. The icon is displayed in a corner of the ad, typically the top right or left.
- You can learn more by visiting <http://youradchoices.com/> or <http://www.youronlinechoices.eu/>.

Approved 3rd Party Vendors:

- DoubleClick, FlashTalking, Pointroll, Sizmek, Spongecell
